

Redesigned portrait-mode tablet software

The new vertical-style layout is designed for small-form tablets with screen sizes ranging from 6 to 8 inches.

Users can now more easily interact with the software using one hand.

Designed for speed.

Built-in tablet version of software. Version 10 now comes with two built-in tablet versions of MicroSale. Choose between the traditional landscape-mode layout or the new portrait-mode.

Designed for order entry. The tablet application allows order entry, payments, recalling checks, table management and all other functionality needed for handling checks. Back-office management, time clock and scale integration has been disabled to reduce the size of the program and increase speed.
